CHECKING	NONE
GRAIN	MIXED
GRADING	CHARACTER
LEED CREDITS	_____

ARNISTON PLANK DESCRIPTION

Character Grade Texas Post Oak Flooring.

Post Oak is a very dense and stable lumber with a fair amount of variations. Texas Post Oak is a White Oak, so the raw wood will finish similarly to your standard White Oak floor. Texas Post Oak offers more interesting grain patterns, color variations and characteristics than standard White Oak. It is also a lot harder and denser, making it a really tough floor for your high traffic areas.
