**RECLAIMED LONG LEAF PINE BEAMS DESCRIPTION**

Rough Sawn Reclaimed Long Leaf Pine Beams.

Beams may include bolt holes, some checking and other character features. Long Leaf Pine beams are harvested from old buildings and barns. These beams are very stable due to the many years of acclimating to the environment. The raw material was first cut around 1880-1900 and used to hold up industrial American factories.

**OPTIONS & UPGRADES**

- Surfaced 4 Sides—S4S Option—Available upon request
- Distressed Option—Available upon request
